

POLYTHERM

NATURAL VENTILATION

A RELIABLE, INSULATING, AND TRANSPARENT SYSTEM!

- Provides great translucency and insulation R1.6 (U3.5).
- Offers 2 distinct ventilation stages.
- Automatic, simple, and without a pulley.
- Silent, economical, and no maintenance.
- Single opening reaching 5 feet (1.5 meters).
- Made of clear U.V. treated polyethylene.
- 2 X 51 watts blowers allow air under pressure between the 2 walls to obtain insulation.
- Oval shape to make raising and lowering easy.
- Standard size and format to make replacement easy.

**SINGLE
POLYTHERM** ▶

A ROBUST SYSTEM WITH LARGE OPENING!

- Opening reaching 10 feet (3 meters).
- Offers 4 distinct ventilation stages for more precision.
- More rigid and safe frame due to its solid permanent center.
- The central support piece is designed to provide rigidity without obstruction.
- Increased stability of membranes when strong winds occur, which extends the lifetime of the product.
- Possibility of replacing only 1 section if broken instead of the entire wall.
