## MODERN CLIMATE CONTROLLER FOR MORE PRODUCTIVE DAIRY FARMS

### Features:

- 10-inch color touch screen with the perfect touch sensitivity.
- User-intuitive navigation with graphic icons and customizable page shortcuts.
- Remote access and climate regulation with FarmOnline™ management program, accessible from the desktops, tablets, and smartphones.
- Effortlessly compatible with natural, side, tunnel, combi tunnel, and hybrid ventilation type.
- Easy-to-use setup and guidance with the intuitive default dashboard according to the selected ventilation type.
- Password-protected function to enable more personalized dashboards and to prevent unauthorized changes, with three different levels of users' access.
- Temperature, humidity, and static pressure reading and adjustment.
- Wind speed reading, wind direction reading, and rain detection and adjustment for regulating curtains in the natural ventilation mode.
- CO<sub>2</sub> and NH<sub>3</sub> reading and adjustment.
- Temperature Humidity Index (THI) reading and adjustment along with heat stress alerts.
- Intelligent lighting management and automation.
- Enabling an 'alarm system' linked to the temperature and humidity sensor, ventilation inlet and outlet, CO<sub>2</sub>, NH<sub>3</sub>, and pressure sensor, emergency inlet, and weather station.
- Activity log that registers operations, events, and alarms with the information of when they took place and when they were deactivated.
- Data are updated in real-time in both the climate controller and FarmOnline™ application.
- Combined with the FarmOnline™ desktop application, it can import the data overview of the barns into insightful offline reports with the graphs in multiple formats.
- Intuitive settings adjustment and free software updates through the FarmOnline™ desktop application, so there is no need to buy a new hardware.
- Designed and manufactured in Denmark.
- Software is available in 35 languages, including English, French, German, Japanese, Russian, Chinese, Spanish, Arabic, and more!
